- *Pressing massage
- *Kneading massage
- *Combination Kneading & Tapping massage
- *4 Level of massage speed adjustment
- *4 Width roller adjustments
- *4 Upper body massage courses
- *Fixed position massage

MONTAGE ELITE ADVANCED MASSAGE CHAIR TECHNOLOGY

Kneading Massage

The kneading massage provides a gentle squeeze, hold and release like a master masseuse to relieve your tight muscles, especially beneficial for your shoulders and neck.

Pressing Massage

The pressing massage rolls up and down your spine stretching your ligaments and helps to decompress your cervical discs to relieve built up pressure in your back.

Tapping Massage

The tapping massage helps to rapidly remove soreness aches, and pains by stimulating muscles with a rhythmic chopping action which increases blood and nutrient flow throughout your

Kneading & Tapping Massage

The combination kneading and tapping gives you a gentle squeeze, hold and release massage relieving tight muscles while the Tapping stimulates blood flow to the muscles.

body.

The Montage Elite massage chair scans your back and has a 30 inch stroke length that reaches from the neck all the way down to the hips.

The Montage Elite massage chair first scans your body to detect your shoulders, the curvature of your spine and your acupoints. The program will adjust the massage to each user. The Montage Elite accommodates persons up to 6' 5". The 30 inch stroke length of the massage rollers provides full back massage coverage. The Montage Elite massage chair provides a vehement back massage from your neck to your hips to relieve tired and sore muscles.

The Montage Elite performs an infrared scan of your back and will then customize the automatic massage program to fit your body. The Montage Elite massage chair comes with 5 automatic massage programs, 4 back courses and 4 massage techniques. The Montage Elite has a lower body traction function which will gently stretch the lower extremities to improve joint mobility. The Montage Elite comes with heat in the chair back, seat and footrest which can be turned on and off independently. Download your favorite massage music onto the Montage Elite's music stick and let the Montage Elite ease you to the highest state of relaxation.

5 Automatic Massage Programs:

The Montage Elite massage chair comes with 5 automatic massage programs. The 5 automatic programs are Relaxation, Activation, Vitality, Morning and Night. You can select the auto program that best fits the area you want massaged. When you activate the Montage Elite, it will start with an infrared body scan to measure your shoulder height, determine the curvature of your spine and identify your acupressure points. The Montage Elite uses this information to customize the massage for you. The automatic massage you selected will then commence.

4 Back Courses:

The Montage Elite massage chair has 4 courses for your back. You can choose an area of your back to focus the massage. You can select from the Whole Back, Shoulder, Middle Back or Waist. The Montage Elite will then massage just the area selected. The back courses are a great way to provide relief to a particular area.

Hip Vibration:

The Montage Elite comes with a Hip vibration massage. You can select the hip vibration massage and adjust the intensity to 4 different levels. The hip vibration stimulates the capillary vessels to improve blood and nutrient circulation.

Heat Therapy:

The Montage Elite has heating pads in the backrest, seat and footrest. You can select where you would prefer the heat application. Heat during your massage increases the blood circulation and relaxes your muscles to optimize the efficacy of the massage.

Air Massage Technology & Footflex Massage:

The Montage Elite incorporates air massage technology utilizing airbags in the seat and foot rest. The air massage technology uses sophisticated software to control the inflating and deflating of the airbags to provide a therapeutic massage to the lower body. The airbags will gently inflate to hold, squeeze and then release different areas of your body including the thighs, buttocks, hips, calves and feet. The Montage Elite has its exclusive Footflex massage built into the foot rest. The Footflex software synchronizes the airbags in the footrest to relieve tension in the heel and arch of your foot. Reflexology nodules are built into the footrest wells to gently push up to stimulate your nerve pathways to reduce stress throughout the entire body. If you love a great foot massage—The Montage Elite is for you!

Lower Body Traction Function:

The Montage Elite has an exclusive Lower Body Traction Function. The traction function holds your feet and calves in the footrest and then stretches your legs from your hips on down. The footrest pivots downward extending your leg joints, ligaments and muscles which helps increase your range of motion. This imperative function is also referred to as a decompression massage.

Music Therapy:

The Montage Elite massage chair comes with an MP3 music player and headphones. Just download your favorite MP3 music files onto the USB music stick and plug it into the Montage Elite. The Montage Elite massage chair has a synchronize massage music feature. You can also synchronize the massage with the rhythm of the music. Sit back, put the headphones on and drift off into higher states of relaxation and tranquility.

Appearance

The Montage Elite is a strikingly elegant massage chair boasting sleek curved armrests and rounded, curved side panels. The padded backrest is soft, comfortable and inviting. The Montage Elite comes in Black, Brown and Ivory.

Colors Available

Performance

The Montage Elite provides a vehement massage and has 4 levels of speed or intensity adjustment. The lower body air massage system provides a total lower body massage. The Montage Elite has advanced features like the Footflex massage, the Lower Body Traction Function, Music Therapy and Heat. You will experience relaxation like never before!

Remote Control

The Montage Elite massage chair comes with a simple and easy to use remote control. You can simply choose from one of the 5 automatic programs and let the Montage Elite go to work. The remote has an LCD which shows the exact status of the massage in process. You can open the left side panel and select from various manual functions. A wireless sub-remote is also included, so you can sit back and make adjustments to the massage without having to move.
